It does help to attach the document.

Vera, I made the changes you requested. Please take a final look and then I'll save it as final and bring it to the RFSC on the thumb drive with the quarterly report presentation.

Thanks,

Bob

Thanks, Bob – my answers are below --

- Lots of words on some slides; understandable since the wording needs to be exact. Some could be broken into 2 slides using bigger font size and making them more legible from the back of the room.

I was intending to read these slides, so don't need larger font. I'm going to encourage folks to read the actual document

- Any white space created by the suggestion above could be filled with a picture/diagram. Visuals always help.
I can't think of any other visuals besides the map

- Some terms or acronyms could be explained verbally: short explanation of what a 5 YR is under CERCLA on slide #2; explain what a toxicity factor is on slide #4; RAO on slide #6.

Thanks for the suggestion. Yes, I'll verbally explain those terms, will also tie "RAOs" to question 1 "as intended by de decision documents" and show where those are in the CAD/ROD (p. 50 etc.)

- Could skip Slide #7, unless it's there for completeness sake. The list of appendices will likely generate comments about "Changes to ARARs" and "Responses to Stakeholder Input".

Agree. Could we push it to the very end, I'd conclude with the Protectiveness Statement slides and only use the list of appendices slides if there are questions

Thanks for your comments. I'd like to get Vera's take on everything before I make any changes, so I'll work on finalizing next Tuesday when we all come back from the holiday.

Lindsay and I agree that the presentation looks great. A few thoughts to consider:

- Lots of words on some slides; understandable since the wording needs to be exact. Some could be broken into 2 slides using bigger font size and making them more legible from the back of the room.
- Any white space created by the suggestion above could be filled with a picture/diagram. Visuals always help.
- Some terms or acronyms could be explained verbally: short explanation of what a 5 YR is under CERCLA on slide #2; explain what a toxicity factor is on slide #4; RAO on slide #6.
- Could skip Slide #7, unless it's there for completeness sake. The list of appendices will likely generate comments about "Changes to ARARs" and "Responses to Stakeholder Input".
